

Person Alphabetically	Question	Week: 29-3-2020 to 4-4-2020						
		Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Devshree	What did you do yesterday?	Exploring and creating Django skeleton	Creating functions in Django views for customer display items	Creating functions in Django views for customer access	Test views and functions for customer	Test access using local sqlite3 database	Test application for localhost and data display	Finalise all working functions and frontend connections
	What will you work on today?	Creating functions in Django views for customer display items	Creating functions in Django views for access	Test using local sqlite3 database	Debug and fix access issues	Shift to localhost and call functions from webpages	Fix bugs and test application for localhost	Merge with views and frontend and test
	Do you have any obstacles?	Database access notations and syntactic problems	Database access notations and syntactic problems	Database access notations and syntactic problems	No	Final frontend issues	No	Connection bugs and syntactic issues
Param	What did you do yesterday?	Exploring and creating Django skeleton for delivery	Creating functions in Django views for delivery agent display items	Creating functions in Django views for access	Fix issues in views and access functions	Test access using local sqlite3 database	Test application for localhost and data display	Finalise all working functions and frontend connections
	What will you work on today?	Creating functions in Django views for delivery agent display items	Creating functions in Django views for access	Fix bugs and issues and test	Test access using local sqlite3 database	Shift to localhost and call functions from webpages	Fix bugs and test application for localhost	Merge with views and frontend and test
	Do you have any obstacles?	Database access notations and syntactic problems	No	Database access notations and syntactic problems	No	Final frontend issues	No	Connection bugs and syntactic issues
Ratnam	What did you do yesterday?	Exploring and creating Django skeleton for restaurant	Creating functions in Django views for restaurant menu	Functions in Django views for rest access	Fix issues in views and access functions	Finalise functions	Test application for localhost and data display	Finalise all working functions and frontend connections
	What will you work on today?	Creating functions in Django views for restaurant menu	Functions in Django views for rest login, access, and edit profile	Fix bugs and issues and test	Resolve add items issues and create accept order function	Shift to localhost and call functions from webpages	Fix bugs and test application for localhost	Merge with views and frontend and test
	Do you have any obstacles?	Database access notations and syntactic problems	No	Issues in returning/display of info	No	Final frontend issues	No	Connection bugs and syntactic issues
	What did you do yesterday?	Design skeleton for restaurant and main pages	Created skeleton for restaurant and main pages	Create and finalise web pages	Debug and fix access issues	Test and resolve frontend display issues and linking	Work on creating all delivery boy side web pages	Test display after connection with database

Person Alphabetically	Question	Week: 29-3-2020 to 4-4-2020						
		Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Sajil	What will you work on today?	Created skeleton for restaurant and main pages	Work on creating all restaurant side web pages	Test and resolve frontend display issues and linking	Test and resolve frontend display issues and linking	Work on creating all delivery boy side web pages	Perform connection with localhost	Minor design changes and testing
	Do you have any obstacles?	No	Formatting issues in general	Issues in display of info	No	No	No	No
Yesha	What did you do yesterday?	Create Django application for accessing SQL database	Setup Django views and models	Exploring and creating Django views for food order	Functions in Django views for order place and access	Fix issues in views and access functions	Finalise functions	Test application for localhost and data display
	What will you work on today?	Working only on sqlite3	Exploring and creating Django views for food order	Functions in Django views for rest login, access, and edit profile	Fix bugs and issues and test	Create display order history function	Shift to localhost and call functions from webpages	Fix bugs and test application for localhost
	Do you have any obstacles?	Environment issues and installing dependencies	Database access notations and syntactic problems	No	Integrating with delivery and rest functions	No	No	No
Yug	What did you do yesterday?	Design skeleton for restaurant and main pages	Created skeleton for restaurant and main pages	Create and finalise web pages	Create and finalise web pages	Test and resolve frontend display issues and linking	Work on creating all delivery boy side web pages	Test display after connection with database
	What will you work on today?	Created skeleton for restaurant and main pages	Work on creating all restaurant side web pages	Test and resolve frontend display issues and linking	Test and resolve frontend display issues and linking	Work on creating all delivery boy side web pages	Perform connection with localhost	Minor design changes and testing
	Do you have any obstacles?	No	Formatting issues in general	Issues in display of info	Issues in display of info	Formatting issues in general	No	No
